DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29, ³⁷~~37~~, 39-40, drawn to a method of making a chitin film, classified in class 427, subclass 101.
 - II. Claims ⁶¹~~38~~, 41-44, drawn to a chitin film, classified in class 428, subclass 212.
 - III. Claims 45-46, drawn to an absorbent-matrix classified in class 525, subclass 7.
 - IV. Claims 30-36, ~~36~~ drawn to a method of forming an absorbent-matrix classified in class 536, subclass 1.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the chitin film of I can be made by removing solvent prior to pressing.
3. Inventions of I and III are independent inventions, one not requiring the particulars of the other. The absorbent-matrix III is not necessarily required in the method of I.
4. Inventions are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a method of making two different inventions drawn to a chitin film of I and an

absorbent-matrix of IV. The matrix of IV has a different function than the film of I, since the matrix of IV is related to a polymeric composition.

5. Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the matrix of IV can be used in fibers.

6. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as being used in fibers, gels, or filaments. See MPEP § 806.05(d).

7. Inventions of II and IV are independent inventions, one not requiring the particulars of the other. The chitin film of II is not necessarily required in the matrix of IV.

8. Inventions III and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the polymerization may be performed by reacting two polymers together.

9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

10. A telephone call was made to Richard Polley on 2/24/03 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
